Hiring Manager

Dear Hiring Manager,

I am writing to express my interest in the **MERN Stack Developer** position. With a strong foundation in enterprise systems (Microsoft Dynamics 365 F&O) and a recent shift into full-stack JavaScript development, I bring a unique mix of scalable architecture knowledge and modern web development skills to the table.

Following a company-wide layoff in September 2024, I took the opportunity to reskill and fully transition into web development. Since April 2025, I've built real-world MERN applications, including a full-featured e-commerce platform called **Paridot.**

Key technologies I work with daily:

- **MongoDB, Express.js, React.js, Node.js**
- RESTful API development & Thunder Client testing
- Responsive UI using **Tailwind CSS & Bootstrap**
- Git, GitHub, and deployment on Vercel/Render

With both enterprise-level consulting experience and modern full-stack development skills, I am confident in my ability to contribute to scalable, maintainable, and user-focused applications.

I am open to both **remote** and **on-site opportunities** and would welcome the chance to contribute to a team that values clean code, collaboration, and continuous learning.

Thank you for considering my application.

Sincerely,
Muhammad Fahad Zaman
